Dropshipping Business Strategies by Michael Green is a book that I bought in order to learn how to make money selling products without having to stock any inventory. In this age of 2016, it is beneficial to look at all your options for working a job and working from home is becoming something more people choose to do. If you want to learn proven steps and strategies on how to start Dropshipping and create a profitable business online this is the go to guide. I have to say if you are looking for a way that has little to no startup costs, then this easy guide will help you with tips from experts and examples to proven techniques to help you along your way. In general this book will show you the Dropshipping way versus the retail store front ways and the advantages along with the disadvantages. Most books just give you the how to guide without the pro's vs. the con's. In a nutshell if you have realistic expectations about the business is the secret to making it grow but commitment will be needed and a support system from family, friends or others in the business who have already succeeded. One thing I have learned is that your payment method needs to be on your site, and the more you offer as a way to pay the better. I have had personal success with PayPal so that is the way to go for me. If you don't have an account it is wise to start now even if you have no clue what Dropshipping business you want to start. If you find this review helpful please hit like, ask questions, thanks so much. Ã Â© 2016 Jackie Paulson

â œDropshippingâ • basically shows how to do business online, the part impressing me the most is to identify the legitimate wholesaler. Internet is just like a virtual world with low barrier of entry, risk is relatively higher as compared to traditional business world. It is important to address the risk of fraudulence to those planning to do online business. However the information provided is not that detailed enough. Hope can improve further, overall it is worth reading.
