## **Synopsis**

Theory Workbooks 1 and 2 are correlated with the All for Strings method books and are suitable for classroom or individual use. Each page features exercises and games which encompass music fundamentals introduced in the method books. Students start by learning the piano keyboard to increase their understanding of the intervals. They also work with fingering chart exercises so that basic theory can be immediately applied to their instrument. In addition to drawing clefs, notes, key and time signatures, students learn about musical phrases and begin composing. Puzzles and musical math games are also included.

I didn't get a chance to finish my violin classes so I wanted to get the last book in this series. So far it has helped me a lot understand music theory and to get the notes down and other things. If you want to take the next step in getting better at the violin this book is for you!

I recommend all three All For Strings books. They are an excellent course of study for the rank beginner through to a more advanced player. The very measured and intelligently arranged songs and exercises consistently lead one toward greater finger strength and accuracy. I've used this series of books over a period of three years and they are by far better learning tools than any of the other basic courses, such as A Song A Day.

Not used to this one, may grow on me with time.
